Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/21/03 has been entered.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 21, 22 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burton in view of Wiechman or vice versa.

It would have been obvious to substitute a boom and linkage as claimed for the boom and cylinder in Burton in view of the teaching in Wiechman or to provide a pin safety structure as claimed in Wiechman in view of the teaching in Burton.

Applicant's arguments have been carefully considered but are not deemed persuasive. The boom in Wiechman has a rectangular cross-section but not a constant size rectangular cross-section. The claim does not call for a constant size cross-section over at least one half the length of the boom. Moreover applicant's boom appears tapered at least at the ends and thus the original specification would not support an

Art Unit: 3641

amendment of a constant rectangular cross-section over at least one half the length of the boom to avoid Wiechman.

4. Claims 21-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kovacs in view of Burton and Wiechman.

It would have been obvious to provide a coupling including the pin safety structure as claimed in Kovacs in view of the teaching in Burton and also obvious to use a box boom construction in view of the teaching of Wiechman (column 3, lines 45-47).

Note applicants have failed to argue this rejection.

5. Claims 1, 2, 3, 5-11, 13-18 and 20 are allowed.
